Orleans Parish Medical Society

MARBLE TABLET IN MAIN HALL OF HOSPITAL.

# THE CHARITY HOSPITAL

OF LOUISIANA,

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROXAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted  
for the means of erecting this edifice, built in the year

1832.

His Excellency A. B. Roman, being Governor and Ex-Officio President  
of the Institution.

To record which and inscribe hereon the names and contributions of  
its distinguished benefactors,

THIS TABLET HAS BEEN ERECTED.

ANNUAL REPORT  
OF THE  
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL  
*For the Year Ending December 31st, 1907.*

CHARITY HOSPITAL, }  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1908.

To His Excellency, N. C. Blanchard, Governor of the State of Louisiana, and Ex-officio President of the Charity Hospital Board of Administrators:

*Your Excellency*—In accordance with custom and law, at the close of the fiscal year the annual report of the Board is herewith respectfully submitted through the Chairman, as also the reports of its Committees and Officers.

The income from all sources, inclusive of a balance in the General Fund of \$3,436.81, and of a loan of \$5,000.00 from the Special Fund, was \$16,300.06 and exceeded the income of 1906 by \$12,187.66. This amount, however, less the balance on hand and the loan, makes the actual gain for the year \$3,750.19, due in great part to an increase from auctioneers' fees of \$3,523.55 and from deceased patients, \$1,393.95, over and above the collections during the preceding year. At the same time the revenues from other fluctuating sources fell somewhat short, as appears in the comparative tabulated statements of the Secretary and Treasurer and of the Finance Committee for the past two years. With regard to the Special Fund, made up of donations, legacies and State appropriations for works of improvement, there is to its credit, \$76,379.92, after expending \$23,128.95 for the purchase of property in the rear of the main building whereupon to erect a large power plant and laundry to meet the present demands of the Hospital, and for such other uses as may be required in the future.

The disbursements for 1907 amounted to \$161,234.08 and exceeded those of the year before by \$4,726.46. Increase of expenditures necessarily follows the growth and development of the Institution.

The erection of the Delgado Memorial will add to the expense and necessitates a larger force of employees and a larger outlay for medical and surgical supplies. The last item alone amounted, during the past year, to \$20,548.28. Among other items responsible for expenditures in excess of those of 1906 may be mentioned: Milk, \$2,594.59; fuel, \$996.96; groceries, \$2,915.31; medical and surgical supplies, \$1,937.20; nurses, \$1,345.25; employees, \$1,176.75. and ambulance service, \$579.33, making a total of \$11,443.37 more expended in 1907 than in 1906.

In this connection, it must be stated that all food stuffs were higher, the corps of Trained Nurses largely increased, and there were treated as inmates 386 more patients, and 1,000 more accident cases than in 1906.

For repairs and improvements \$8,347.24 was expended, being less than in the preceding year. To the credit of the General Fund there remained on hand in cash on the 1st of January, \$1,772.83. The \$5,000.00 borrowed from the Special Fund will have to be returned from the revenues of the present year, as the Special Fund is never employed for maintenance and support. We begin the year, therefore, with an income which proved insufficient last year by \$3,227.17, and which is \$6,563.98 less than at the commencement of the year before. There is, therefore, pressing need for an increased appropriation if the present efficiency is maintained, and also to meet the expense incident to the opening of the Delgado Memorial. The present income will not tide us through the year, and to retrench would mean a step backward and block the efforts of the Board to keep the Hospital abreast of progress in hospital affairs. As a humanitarian example of a great State's benefac-

tion, a source of pride to its people, and of praise and admiration from everyone cognizant of its noble work, it should not be permitted to suffer, and we, therefore, earnestly appeal to your Excellency and to our legislative bodies to consider its wants when appropriations are in order.

During the year there were admitted 8,850 patients, and including the 665 remaining, 9,515 received treatment. Of the admissions, 5,294 were whites and 3,556 colored. Of the whites, 3,294 were adult males, 1,435 adult females, 399 boys and 164 girls. Of the colored, 2,322 were adult males, 1,050 adult females, 122 boys and 62 girls. In the Outdoor Clinic for Men and Boys, 8,835 were treated, and 35,177 consultations were given. In the Clinic for Women and Children, 4,750 received treatment and 33,626 consultations were given. The total number in the Clinics numbered 13,585 and of consultations, 68,803. The number of Ambulance calls were 1,929. Of accident cases, 7,106, of operations, 2,357, and of obstetrical cases, 296. The total number of deaths was 1,363, making a gross death rate of 14 per cent. and a net death rate of 9.1 per cent. after deducting the deaths occurring within twenty-four or forty-eight hours.

The Registrar reports a tabulated record of 9,034 histories. In the Pasteur Clinic 465 applied and 212 were treated for suspected rabies infection.

The Pathological Department reports 11,549 examinations, which include urinalyses, microscopic examinations of specimens and autopsies.

The Training School for Nurses contains ninety-nine pupils, which is about thirty more than the year before. At the graduation exercises, on the 11th of December, diplomas were issued to twenty-three Nurses.

At the session of the Legislature, in 1906, a committee of the Board applied for \$150,000.00 to erect a new Administration building, power plant and laundry. The amount was cut down

to \$50,000.00, of which only \$25,000.00 has been received, a sum totally inadequate for the purpose contemplated.

Whilst the erection of a new Administration Building is not a matter of urgency, that of a larger power plant is imperative and of absolute necessity. Our Chief Engineer informs us that the boilers are old and entirely inadequate for the work to be done, and the power-house too small to increase the boiler capacity.

The recent purchase of two-thirds of a square in the rear of the Hospital will furnish the ground for the erection of a larger power-plant, and funds permitting in the near future, let us hope, of an electro power-plant, refrigerating plant, workshop, laundry and crematory; necessary adjuncts of a great hospital.

In the way of improvements there has been an extension of pipe lines and steam mains, for a more satisfactory water supply. The Pathological Department has been enlarged, fitted with modern conveniences for Pathological work, and for that of the Pasteur Institute. The screening of openings in the main building mentioned in the last annual report has been extended to the white and colored female buildings.

Before the close of the present year the Delgado Memorial will have been erected and ready for occupation. Specifications have been approved by the Board and bids invited through the daily press. Constructive work will begin within two weeks after acceptance of the lowest bid. A story is now being raised above the Ambulance House to furnish quarters for additional Students, as more will be needed for the Delgado Memorial and also for the relief of the present Corps, who are much overtaxed.

In concluding, the Board extends its thanks to its faithful and competent Officers for work satisfactorily and conscientiously performed, which meets with their full appreciation and commendation.

To Sister Agnes and the Corps of Sisters, for their excellent management, devotion to duty and motherly care and supervision of the inmates of this Hospital.

To the Attorneys of the Board, the Visiting Staff, Resident Students, Ambulance Corps, Nurses and Employees.

In conclusion, my colleagues, I tender you my sincere and grateful thanks for your invaluable aid and earnest zeal in the management of the great trust confided to your hands. Our meetings have been noted for harmony and good fellowship, though differing on occasions and the interests of this Institution have ever been close to your hearts.

E. S. LEWIS, M. D.,

VICE-PRESIDENT.

## Annual Report of the House Committee.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1908.

To the Vice-President and Board of Administrators, New Orleans Charity Hospital,  
New Orleans, Louisiana:

*Gentlemen*—The House Committee respectfully report that during the past year all openings in the white and colored female buildings have been screened with No. 18 bronze wire screen, as required by the Board of Health. The dining rooms of the Doctors and Students, as well as that of the Sisters, were likewise screened. This completes screening all Hospital buildings.

The Pathological Department was enlarged to meet the requirements of our Institution, two large, additional rooms being added and the entire Department renovated. All interior office fixtures in the Department were made by our House Carpenter.

The addition has been fitted up with modern plumbing, steam heating, electricity and gas, and all openings have been screened.

Mains were extended across Tulane Avenue to Ambulance House, furnishing that Department with hot and cold filtered water from the main power plant. Steam mains were extended at the same time for future use, our present boiler capacity not permitting the furnishing of steam heat throughout this building.

Additional horses were purchased during the year and a third ambulance employed. All stock and all ambulances are in first-class condition.

The addition of a third story to the Ambulance Building is in course of construction. The plans provide for the accommodation of sixteen to twenty additional Students, besides furnish-

ing them with a library room, better facilities for bathing, and modern plumbing. The second floor is being changed to conform with the third.

The wooden flooring in yard of the Ambulance Building has been replaced with brick.

Additional hose was purchased during the year and all fire extinguishers, hose stretchers and fire apparatus regularly inspected.

We are obligated to Mayor Behrman for assistance in securing are lights upon Hospital grounds, repairs to Howard street and permission to lay mains across Tulane avenue.

We are obligated to Veterinarian Dr. Vincent Ranna, who has taken care of our horses when sick without charge to the Institution.

The following recapitulation, especially arranged by our Committee, makes comparison with last year's expense possible, and shows per capita cost of operation:

	1906	1907	INCREASE.	DECREASE
Meat .....	\$10,746 48	\$10,884 46		
Bread .....	5,055 48	4,280 21		
Milk .....	6,881 41	9,476 60		
Ice .....	1,564 48	1,975 35

In our last annual report we recommended to you the absolute necessity of a new power plant.

We now advise that unless we have increased boiler capacity by the time the new Delgado Memorial Building is completed, it will be impossible to furnish steam heat throughout that building. We make this report after consulting Chief Engineer Ponder, and realize that you appreciate it would not be possible to place sick people in the beds of this building until we were able to keep the building properly heated.

The present boiler power is entirely inadequate to satisfactorily accomplish and economize the amount of work to be done. Also the present power-house is too small to increase the boiler capacity. An increase of power will have to be considered previous to the completion of the Delgado Memorial Hospital and before heat can be supplied to Ambulance House. We require a larger space for our steam plant and of a sufficient size to make such improvements that are absolutely necessary, also to take care of an electric power plant, refrigerating plant, workshop, laundry and crematory.

The installation of a new plant has been carefully considered, and plans and specifications have been carefully prepared by Chief Engineer Ponder and accompany this report for your consideration. In order to accomplish the above it was necessary to measure up all the radiation of the different buildings of the Institution where steam is supplied.

At present we are supplying steam to develop 300 horsepower with a boiler capacity of only 225 horse-power. The

above had to be carefully gone over to ascertain the horse-power for the new plant and considering the additional machinery that is shown on plans for same.

The capacity of the electric plant will be 100 horse-power engines, direct connections to two K. W. (200 volts) generators each as a unit, so they can be used alternately twelve hours each. The above generators will have a sufficient capacity to furnish power to six electric elevators and 500 16 candle-power incandescent electric lamps, 30 rotary fans, laundry motor, X-Ray and other medical and surgical apparatus.

Provisions are also made for all necessary pumps, including one large Underwriter's fire pump and laundry outfit, one 15-ton refrigerating outfit complete, equal to  $7\frac{1}{2}$  tons of ice per day.

Plans will show space allotted to workshop and crematory. The boilers to accomplish the above work are also shown on plans of a generating capacity of 600 horse-power.

You will notice that provision has been made and space left to increase boiler power whenever it may become necessary. The boilers are divided into four units in order to furnish the power in such quantities as may be desired. The units may be so fitted as to work single or all together. The total cost of installing plant as above described, including moving of laundry, filters and other machinery from present plant to new site complete and ready to turn over, would be \$32,500.00, not including the buildings.

The demands upon our Committee for additional floor space for the Pathological Department, additional buildings to accommodate more students, better facilities for housing male and female help, who at present sleep in wards occupied also by the sick and above the boiler rooms the establishing of isolation wards, the continued increase in patients applying, all call for increased expenses and depreciation of our Reserve Funds. Appreciating the fact that our report, as well as those of our

colleagues, are intended for the General Assembly of the State of Louisiana, and to familiarize you with an approximate cost of contemplated improvements and additions, we give the following:

Elevator in Main Building .....	\$4,500 00
Elevator in Female Building .....	2,500 00
Sanitary tiling floor, Main Building .....	5,000 00
Cost of property for proposed Engineering Department, Coal Bins, Crematory, etc.....	30,000 00
Cost of Machinery, as per figures furnished by Chief Engi- neer Ponder .....	32,500 00
Cost of Buildings for Engine-rooms, Laundry and Ice House .....	30,000 00
Additional Store to Ambulance Building.....	9,000 00
Total .....	\$113,500 00

The above refers only to immediate necessary expenses and does not include the increase in operating expenses of, approximately, \$10,000.00 a year, account new Delgado Hospital, or building of isolation wards upon space now occupied by Engineering Department, a more suitable abode for Sisters and help, all of which will, we know, be carefully considered by your Budget and Finance Committees.

We cannot too strongly recommend the able services of Chief Engineer Ponder, whose duties are constant and well performed.

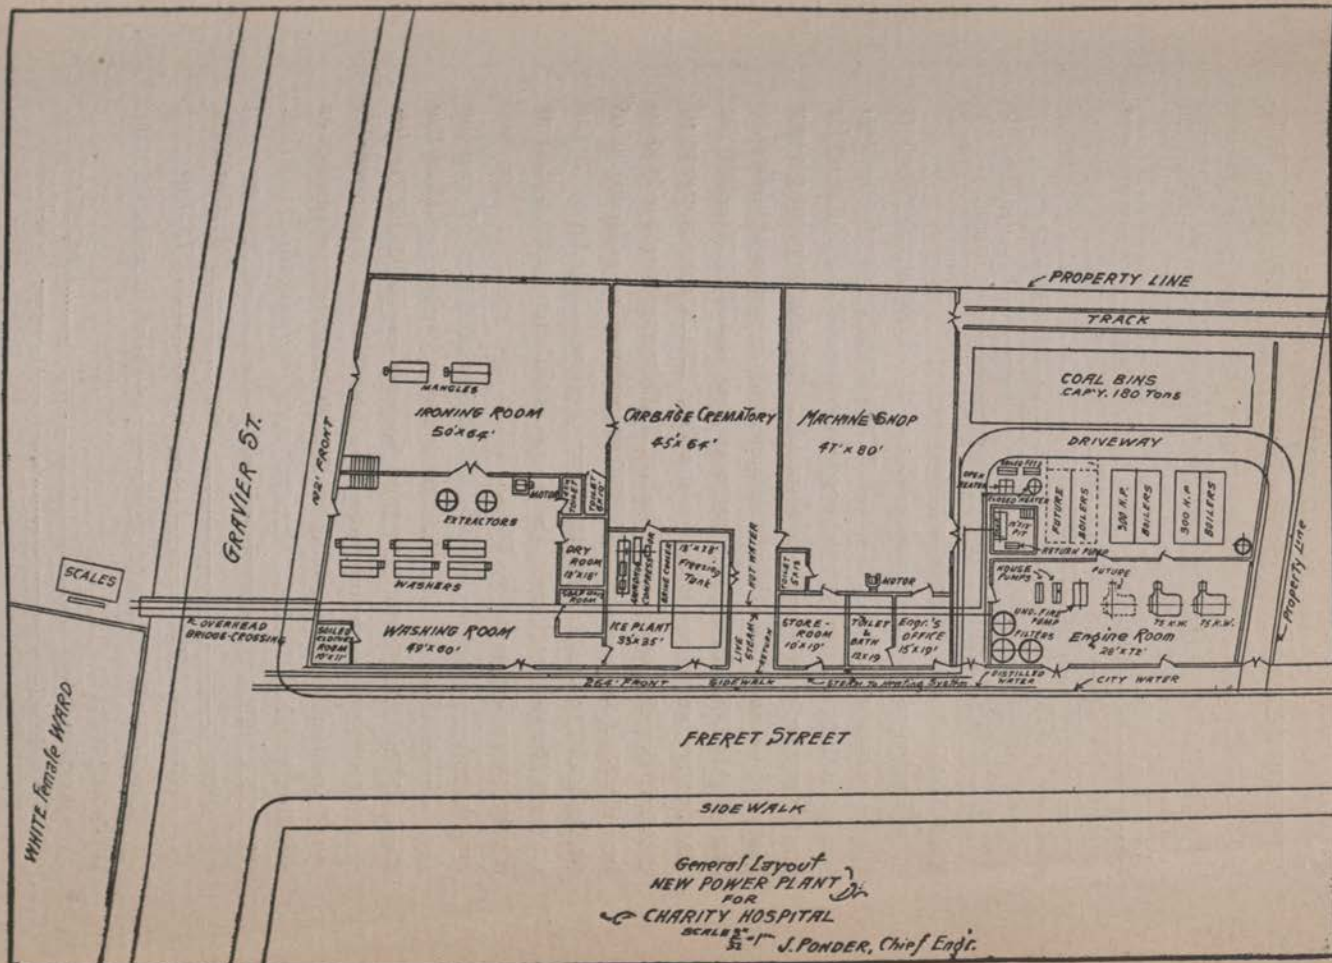

The services of the "Sisterhood of Charity," rendered as they are in conjunction with your Committee, save the Institution thousands of dollars annually and furnish a devotion to duty and motherly care of the sick and dying beyond the praise of mere words.

Respectfully submitted,

LOUIS ED. VALLOFT, *Chairman.*

JOHN T. GIBBONS,

WM. G. VINCENT.

# Annual Report of the Finance Committee.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 1, 1908.

To the Vice President and Board of Administrators:

*Gentlemen*—Your Finance Committee respectfully report that the accompanying statement, prepared by the Treasurer, has been duly examined by the Special Committee appointed for that purpose, and found to be correct. This statement gives a history in detail of all the receipts and disbursements during the year 1907. It shows the total receipts of \$163,006.91 for 1907, as against \$150,819.25 for the year 1906, or an increase of \$12,187.66. It also shows the total disbursements for 1907 to be \$161,234.08, as against \$156,507.62 for 1906, or an increase of \$4,726.46. At the close of the year there was a balance in the General Fund of \$1,772.83, as against a balance of \$3,436.81 at a corresponding period in 1906.

As a matter of fact, there was a deficit of \$3,227.17, and the above cash balance is shown by reason of the fact that the General Fund borrowed \$5,000.00 from the Special Fund, which amount will be repaid to the Special Fund as soon as possible.

The items of disbursements show no marked increases over similar items of 1906, except milk, \$2,595.19; groceries, \$2,915.33. This increase is offset by the following decreases:

Bread.....	\$775 37
Repairs .....	7,227 05

The following items of cash receipts show increases during the past year:

Auction sales.....	\$3,523 55
Gate receipts .....	147 30

The Special Fund is deposited in various banks, now bearing a uniform rate of  $3\frac{1}{2}$  per cent. per annum interest. The total amount to the credit of this fund, including interest, on December 31, 1907, was \$76,379.92.

As mentioned in previous reports, this fund is created and maintained by donations and legacies, and is used for the purpose of erecting new buildings and making permanent improvements. There was purchased and paid for out of this Special Fund, during the current year, property on Freret street, to the amount of \$23,128.95. A list of the contributors to the Special Fund forms a part of the Treasurer's Report. A notable contribution, made during the past year, was the donation of \$180,000.00 by Mr. Isaac Delgado, of this city. This amount, added to the \$20,000.00 previously donated by the estate of the late Mrs. Samuel Delgado, will be used in the construction of a magnificent building on Tulane Avenue, to be known as the "Delgado Memorial."

One-half of a legacy of \$2,500.00, left to the Hospital by the late Alfred Derigny, was returned to the heirs on advice of counsel. The last will and testament of donor had been attacked by the heirs and the sum of \$1,250 00 was paid in full settlement by way of compromise.

Respectfully submitted,

HUNTER C. LEAKE,

R. E. CRAIG,

CHAS. A. FARWELL,

*Finance Committee.*

## Annual Report of the House Surgeon.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, February 3, 1908.

To the Board of Administrators of the Charity Hospital:

*Gentlemen*—Among other duties pertaining to the Executive Officer of this Institution is that of rendering an annual statement of the management of its medical affairs; to offer such recommendations as may seem necessary after considering the experience of the year, and to present to you, in concrete form, all statistics bearing upon the medical affairs of this Hospital. This I now have the honor to do.

The demands upon the resources of the Institution in the past year have been increasingly severe. The rapid increase in the number of indoor patients, and the greatly augmented accident and emergency work, have not only necessitated a marked increase in the yearly expenditures, but have, at times, perplexed the Resident Medical Staff to efficiently meet these unusual requirements. The burden of this increased work has been felt chiefly in the accident and emergency service, in which more than 1,000 patients in excess of any previous year have received immediate medical or surgical attention.

These unusual conditions have necessitated an increase in the Nursing Corps which, as far as circumstances permitted, has been done. It has also rendered it necessary to add to the number of Internes, the wisdom of which your Honorable Body has recognized and sanctioned by ordering the construction of quarters for the additional Students to be appointed.

We have met conditions as they presented themselves, and the routine medical and nursing service has suffered no impairment from any cause.

Briefly, the record of the year's work is as follows:

There were 8,850 patients admitted; white, 5,294; colored, 3,556. White male adults, 3,296; white female adults, 1,435; colored male adults, 2,322; colored female adults, 1,050; children, 747; white, male, 399; white, female, 164; colored, male, 122; colored, female, 62. On January 1, 1907, there remained 665 patients in the Hospital. Adding to this the number admitted during the year there were 9,515 treated in the wards. The daily average of inmates was 691. There were 1,363 deaths; 7,414 patients were discharged and 738 remained on January 1, 1908. There were 804 deaths from incurable conditions, of which 245 were from tuberculosis. The gross mortality was 14 per cent. and the actual death rate 9.1 per cent. The Coroner viewed 261 bodies; 482 patients died within thirty-six hours after admission.

In the Outdoor Clinics there has been a marked decrease in the number of patients applying for treatment. Only 12,588 sought the benefits of the service with 68,803 consultations, as compared with 19,599 and 70,916 consultations for the previous year.

The Ambulance Corps responded to an unprecedented number of calls. This Department made 1,929 calls in an average time of twenty-eight minutes. This service has been maintained at the highest point of efficiency and all calls answered with promptness and dispatch.

In the A. B. Miles' Surgical Amphitheatre 7,106 accident and emergency cases received immediate attention. General anæsthesia was induced 1,589 times, local analgesia, 202 times, spinal analgesia, 258 times, and 2,357 surgical operations were performed.

There were 296 parturient women delivered in the obstetrical wards and 301 children given birth. The total mortality in this service from all causes, including eclampsia, post-partum hemorrhage, placenta previa, septicæmia and shock, was 3 per

cent. This is justly considered a low death rate since many of these were Ambulance cases brought in after eclampsia had developed, or after previous unsuccessful efforts had been made at instrumental delivery.

The Department of Pathology, to which important additions have been made, has been most ably conducted by Drs. O. L. Pothier, Pathologist, and M. Couret, Assistant Pathologist. Examinations of 11,549 specimens of various excretions and pathological products were made and numerous valuable specimens added to the pathological archives and museum. Patients from four States, numbering 465, were given gratuitously the preventive treatment for rabies in the Pasteur Clinic.

The expense of operating the Hospital Dispensary was considerably in excess of the last year. This is readily accounted for by the increased cost of drugs, and by the necessarily increased consumption of drugs and medical supplies. Mr. Walker, the Chemist, has economically and efficiently discharged the duties of his position.

There were 9,034 clinical histories classified and filed in the Registration Bureau, as follows: Medical, 3,768; Surgical, 3,886; Gynæcological, 638, and Obstetrical, 742. I cannot too highly commend the services of the Registrar, Dr. G. Farrar Patton, who has introduced many important changes and developed the Bureau to a state of perfection. A complete history of the ailment, physical condition and treatment of every patient admitted to this Hospital, together with result of treatment, is there kept on file. These statistics are of great value to medical writers and those engaged in medical research, and are preserved in such manner as to be easy of access and identification.

The Department of Electro-therapeutics and Radiography has contributed very greatly in elucidating obscure lesions of the human anatomy. 610 radiographs and 319 fleuroscopic examinations for diagnostic purposes were made by the physician in charge. Special reports concerning the Training School for

Female Nurses have been addressed the Medical Committee. I may add that patients now receive nursing of an excellent degree—far superior to that of past years.

In the way of recommendations I cannot do better than quote from my last annual report: "I would first recommend that all patients ill of pulmonary tuberculosis be segregated and placed in wards specially altered to suit the therapeutic and hygienic requirements necessary in the management of this disease.

"I would remind you of the dangers of infection to which other patients, already weakened by other diseases, are exposed when brought in hourly contact with tuberculous subjects. Sleeping in and breathing the air of the same wards occupied by tuberculous patients is a grave and unnecessary risk for non-tuberculous, but weak and devitalized patients to be exposed to. Better hygienic conditions and infinitely better treatment for tuberculous patients could be maintained and practiced were all such cases assigned to wards specially set aside for them. I ask to be relieved of the grave responsibility of mixing tuberculous with non-tuberculous subjects with the inevitable danger imposed upon the latter." This recommendation failed to receive your action and I trust you may now give it favorable consideration. I desire to again urge the necessity for providing a separate building for the isolation of contagious and infectious diseases. It has been a matter of the greatest difficulty to isolate these infections, and then only by placing patients sick of various infectious diseases in the same wards. This constitutes nothing less than a sanitary crime.

The domestic affairs of the Hospital, under the supervision of Sister Agnes, have been managed with that degree of excellence possible only to one long familiar with the care of the sick and the needs of the Institution.

My two assistants, Drs. J. A. Danna and S. W. Stafford, have ably seconded my efforts in the year's work and deserve

the thanks which I now declare. Mr. Jas. R. Leake, Clerk, and Mr. John Ponder, Engineer, have each, in his special sphere, rendered valuable and highly satisfactory services to the Institution.

In conclusion, I desire to express my appreciation of the unfailing courtesy and assistance extended me by your Honorable Board in the various and complex duties of my office.

Respectfully submitted,

J. M. BATCHELOR,

HOUSE SURGEON.

# Pathological Department.

CHARITY HOSPITAL,  
STATE OF LOUISIANA,  
NEW ORLEANS, February 3, 1908.

To the Board of Administrators of the Charity Hospital:

*Gentlemen*—I have the honor to submit the following reports of the Pathological Department and of the Pasteur Institute for the year 1907:

Specimens of urine examined.....	6,253
Specimens of sputum examined .....	980
Specimens of blood examined.....	3,439
Specimens of fœces examined.....	320
Specimens of stomach contents examined .....	15
Specimens of pus examined.....	87
Specimens of cultures examined.....	101
Specimens of tissues examined.....	111
Specimens of fluids examined.....	19
Autopsies held.....	178
Photographs taken.....	49
Total.....	11,549

In the Pasteur Institute 465 cases applied for treatment. Of these, 253 were dismissed without treatment; 212 were treated; from these 181 cases were discharged, 27 deserted and 1 died. There were 3 left over to January, 1908.

The residence of these patients was as follows:

Mississippi.....	69
Tennessee .....	8
Texas.....	3
Louisiana.....	385
	465

During the past year the Pathological Department has been totally renovated. The museum has been given proper space and the specimens have been remounted, labeled and indexed. The animal room has been arranged so that it can be properly kept. A record room has been provided, where all the records of the Department are kept. A large and well lighted room for the routine work has been added. On the opposite side of the Department a corresponding room has been arranged so as to give private offices for the Pathologist and the Assistant Pathologist, also proper space for taking photographs. All the records of the Department are kept by the card index system and we are now indexing the photographs by double index of subject and number and will soon have these finished.

In concluding this report I wish to commend the work of Dr. M. Couret and the assistance given by the Resident Students detailed to the Department during the year, and especially that of Mr. J. T. Nicolle.

Respectfully,

O. L. POTHIER, M. D.,

PATHOLOGIST.

## Report of Directress.

CHARITY HOSPITAL,  
STATE OF LOUISIANA, }  
NEW ORLEANS, December 11, 1907.

To the Members of the Medical Committee, Charity Hospital, Board of Administrators:

*Gentlemen*—A resumé of the results of fourteen years—of the practical work of a school directorate—not the least recognized factors for the successful issue of which are the careful selection of candidates, recognition and appreciation of merit and a maternal and individual guidance has a pertinent significance; the solution whereof finds expression in an ever-vying effort, gaining new impetus with the lapse and progress of years.

The completion of the fourteenth annual session of our School enables me to feel that, with each succeeding year, there is not a mere chronicle of accomplishment presented; it likewise permits the exhibition of statistical data, verifying its steadily increasing vigor and recognized plane as an educational center, signalizing with the seal of its approval distinctive individuality and merit.

The early part of the year witnessed a dearth of desirable applicants. This deficiency it became particularly necessary to overcome for manifold and obvious reasons; in view of the depletion occasioned by the graduation of so large a number, exceeding that of any previous year; the record of the requirements of a constantly broadening work, and finally in anticipation of the proposed erection of the Delgado Memorial. My efforts to cope with this decrease of applicants were most ably seconded by your Board's thoughtful and opportune suggestion; that of making known the advantages of the School through the media of progressive papers. To this effect descriptive circulars

were sent to the various editors of the surrounding States with gratifying result. The list of applications received during the year numbered two hundred and twenty-seven. Of these ninety-five were accepted. The present enrollment shows ninety-eight pupils, including fifteen on probation.

During the year's course nine were released, two of whom, I regret to say, were necessary dismissals. The health of the School has been exceptionally good. The session of 1908 will open with a Senior Class of twenty-three and a Junior Class of thirty-four, to be completed from the most promising probationers. The present Senior Class of twenty-six in number, having successfully completed the test of examination, and with the approval of the Faculty of Lecturers, await your favor for their diplomas.

My kindest wishes for the success of their careers attend them and I ask God's blessing upon them.

Vying efforts on the part of the Teaching Corps and my associates have tended to the perfection of educational advantages and the promotion of every opportunity for instruction.

The usual course in Invalid Cooking and Massage Instruction, with practical demonstration, have supplemented the session's curriculum.

The didactic course, fostered and encouraged by our excellent Faculty of Lecturers, has received the diligent efforts of each member. Their attention evokes my appreciation and gratitude. It is my pleasure to express my thanks to our kind House Surgeon, Dr. J. M. Batchelor, and his able assistants, Drs. J. A. Danna and S. W. Stafford, who have ever manifested a hearty co-operation and generous assistance.

In conclusion, I beg to renew my sentiments of grateful appreciation to your Committee, whose support, generosity and latitude for progress are our strongholds in a service for charity.

Respectfully submitted,

SISTER AGNES,  
DIRECTRESS.

## Report of the Chairman of the Faculty.

CHARITY HOSPITAL,  
STATE OF LOUISIANA,  
NEW ORLEANS, December 11, 1907. }

To the Vice-President and Members of the Board of Administrators:

*Gentlemen*—This completes the fourteenth year of existence of the Charity Hospital Training School for Female Nurses.

There were ninety-nine Nurses enrolled during the session just completed, twenty-six of whom graduate to-day, and we enter upon the new year with seventy-three on the roll. This is most gratifying, evidencing, as it does, the popularity and healthy growth of the School.

The health of the Nurses composing the School has been uniformly good, and we are thankful that we have safely passed a year without a fatal illness among them.

It is my pleasure to present to you the twenty-six young ladies comprising the Graduating Class of 1907. They have served the required two years, faithfully observed all regulations governing the School, and have successfully passed all examinations. They now appear before you to receive at your hands the Hospital diploma, which I recommend be conferred upon them.

We take great pleasure in acknowledging the valuable services rendered the School by the gentlemen composing the Faculty of Lecturers. To them our thanks are gratefully offered.

The administration of the School by our benevolent Directress, Sister Agnes, and Superintendent of Nurses, Sister Dolores, has been directed to the betterment of the School and the elevation of the profession of Nursing.

Respectfully submitted,

J. M. BATCHELOR, M. D.,

CHAIRMAN.

Rib .....				1	1	Empyema.	
Hip Joint. Osteoplastic Operation .....		1			1	Arthritis Deformans and Ankylosis.	

## Sequestrotomies—

Ankle Joint.....	1	1	Gunshot Wound.
Ankle Joint.....	1	1	Necrosis.
Bones of Face.....	1	1	Gunshot Wound.
Nasal Bones.....	3	3	Necrosis.
Bones of Skull.....	2	2	Necrosis.
Maxilla. Inferior.....	3	3 1	7 Necrosis.
Femur.....	2	2	2 Necrosis.
Forearm.....	1	1	1 Gunshot Wound.
Ilium.....	1	1	1 Necrosis.
Tibia.....	1	1	1 Old Compound Fracture.
Tibia.....	1	1	1 Osteomyelitis.
Bones of Foot.....	1	1	1 Necrosis.
Bones of Foot.....	1	1	1 Tuberculosis.
Bones of Foot.....	2	2	2 Old Compound Fracture.
Humerus.....	1	1	1 Necrosis.
Radius.....	1	1	1 Necrosis.
Scapula.....	1	1	1 Gunshot Wound.
Ulna.....	1	1	1 Old Gunshot Wound. Necrosis.
Vertebrae. (1 Bullet Removed).....	2	2	2 Old Gunshot Wound. Necrosis.

## Osteoclasia—

Femur.....	1	1	1 Faulty Union.
Forearm.....	1	1	1
Bones of Knee.....	1	1	1 Genu Varum.
Bones of Knee Redressment.....	1	1	1 Genu Valgum.
Leg. Both Bones.....	1	1	1 Faulty Union.

## Curettages—

Neoplasm of Maxilla Superior.....	1	1	1 Epulis Malignant.
Neoplasm of Cheek.....	1	1	1 Carcinoma.
Clavicle.....	1	1	1 Tubercular Periostitis.
Old Sinus. Temporal Region.....	1	1	1
Ulcer of Forehead.....	1	1	1
Ulcer of Leg.....	4	4	4
Frontal Bone.....	1	1	1 Necrosis.

Operation.	Result.				Total.	Diagnosis. Remarks.
	Cured.	Improved.	Stationary.	Died.		
Curettages—Continued.						
Tibia.....	1				1	Osteomyelitis.
Tibia.....		1			1	Old Gunshot Wound.
Os Innominatum.....	1				1	Necrosis.
Os Calcis.....		1			1	Tuberculosis.
Metatarsal Bones.....		1			1	Necrosis.
Mastoid Process.....		1			1	Necrosis.
Humerus.....		1			1	Osteomyelitis.
Rectal Ulcers. Cauterized.....	1				1	
Cavity in Pectoral Muscles.....	1				1	Gunshot Wound.
Gynæcological—						
Aspiration. Exploratory.....		1			1	Cystic Fibroma of Uterus.
Incision and Drainage.....				1	1	Degenerating Fibroid of Uterus.
Uterine Curettage.....	153	2	1		156	Endometritis. (Many with other operations.)
Uterine Curettage.....	24			3	27	Puerperal. (One death from Rupture of Appendix.)
Uterine Curettage.....	1				1	Old Lacerations.
Uterine Curettage and Cauteriza- tion.....	1	6	1		8	Carcinoma of Cervix.
Cauterization.....		1	1		2	Carcinoma of Cervix.
Adhesions Severed.....	1				1	Adherent Clitoris.
Vaginal Puncture.....	1				1	Hydrosalpinx.
Vaginal Puncture.....	1				1	Suppurating Dermoid Cyst.
Vaginal Incision.....	3				3	Pyosalpinx.

Vaginal Incision.....	10	4	2	16	Pelvic Abscess.
Vaginal Incision.....	2			2	Vulvo-Vaginal Abscess.
Vaginal Section.....	1			1	Tubal Pregnancy.
Vaginal Hysterectomy.....		1		1	Carcinoma.
Vaginal Hysterectomy.....	1			1	Fibroma.
Amputation of Cervix.....	7	1	1	9	Various.
Excision of Bartholin's Glands.....	3			3	Vulvo-Vaginal Adenitis.
Uterine Polypus Removed.....	7			7	
Dilatation of Cervix.....	3			3	Cervical Stenosis.
Dilatation of Urethra.....					Foreign Body (Pin) in Urethra.
Dilatation of Vagina.....	1			1	Vaginismus.
Alexander's Operation.....	14			14	Retroversion of Uterus.
Wertheim's Operation.....	1		1	2	Carcinoma of Uterus.
Vesico-Vaginal Fistula.....	6		1	7	
Recto-Vaginal Fistula.....	3	1		4	
Suprapubic Cystotomy.....	1			1	Vesical Calculus.
Colporrhaphy. (Separately).....	15		1	16	Various.
Trachelorrhaphy. (Separately).....	26		1	27	
Perineorrhaphy. (Separately).....	40	1		41	
Perineorrhaphy and Colporrhaphy.....	11	2		13	
Trachelorrhaphy and Perineorrhaphy.....	52			52	Many with other Operations.
Myomectomy.....	7			7	Myoma of Uterus.
Vaginal Examination.....			4	4	Various.
Vaginoplasty.....		1		1	Congenital Malformation.
Manual Extraction.....	2			2	Retained Placenta.
Genito Urinary—					
Nephrotomy.....	1		1	2	Nephrolithiasis.
Nephropexy.....	3	1	1	5	Nephroptosis.
Nephrorrhaphy.....	1			1	Stab Wound of Kidney.
Nephrectomy.....		1	1	2	Tuberculosis of Kidney.
Nephrectomy.....		1		1	Sarcoma of Kidney.
Nephrectomy.....	1			1	Traumatic Rupture of Kidney.
Exploratory Puncture.....			1	1	Hematuria.

Operation.	Result.				Total.	Diagnosis. Remarks.
	Cured.	Improved	Stationary.	Died.		
Genito Urinary—Continued.						
External Urethrotomy.....	18	6			24	Stricture.
External Urethrotomy.....	2			4	6	Stricture with Extravasation.
External Urethrotomy.....	1			4	5	Rupture of Urethra.
Urethrotomy and Urethroplasty...		1			1	Congenital Atresia of Meatus.
Dilatation of Urethra.....	1	2			3	Stricture.
Internal Urethrotomy.....	15	5			20	Stricture.
Excision, Suturing, etc.....	3			1	4	Fistula of Urethra.
Suprapubic Cystotomy.....				1	1	Retention of Urine.
Suprapubic Cystotomy.....	4	1		1	6	Vesical Calculi.
Suprapubic Cystotomy.....			1		1	Carcinoma of Bladder.
Suprapubic Cystotomy.....		1			1	Tuberculosis of Bladder.
Circumcision.....	113				113	Phimosis, etc. (Many in combination).
Varicocele.....	7	2			9	
Hydrocele-Tunica Vaginalis.....	19	1			20	
Hydrocele. Cord.....	2				2	
Suprapubic Prostatectomy.....	1	2			3	Hypertrophy of Prostate.
Perineal Prostatectomy.....	6			2	8	Hypertrophy of Prostate.
Perineal Cystotomy.....				1	1	Carcinoma of Bladder.
Orchidectomy.....	6				6	Various.
Cord Stretched. Hernioplasty.....	1				1	Monorchidism.

## Eye—

Reduction .....	1			1	Dislocation of Eyeball.
Staphyloma Enucleated .....	1			1	
Tenotomy .....	3			3	Strabismus.
Cataract, Senile .....	21			21	
Incision of Cornea .....		1		1	Hypopion.
Enucleation of Eye .....	10	1		11	Various.
Pterygium .....	2			2	
Iridectomy .....			1	1	Glaucoma.
Excision .....		1		1	Cyst of Eyeball.

## Conservative—

Ankle .....		1		1	Old Compound Fracture.
Plastic Work on Face .....		1		1	Old Gunshot Wound.

## Miscellaneous—

Aspiration and Iodoform Injection .....	1			1	Tubercular Abscess. Hip Joint.
Incision and Iodoform Injection .....	1			1	Tubercular Abscess.
Cataphoresis. Mercuric .....	1			1	Epithelioma of Cheek.
Cauterization .....	1			1	Carcinoma of Jaw.
Cauterization .....		1	1	3	Ulcer of Rectum.
Cauterization .....	2			2	Condylomata.
Cauterization. (Some also Cured) .....	38	1		39	Chancroids.
Craniotomy .....	31	2	6	39	Fracture of Skull.
Craniotomy .....		1		2	Epilepsy.
Craniotomy .....	2	1	1	4	Gunshot Wound of Head.
Craniotomy .....	1			1	Necrosis of Skull.
Cheiloplasty .....	11		1	12	Harelip.
Asch Operation .....		1		1	Deviation of Nasal Septum.
Dilatation of Esophagus .....		2		2	Stricture.
Dilatation of Rectum .....	1	10	1	12	Stricture. Some with Ulcers.
Dilatation of Lachrymal Duct .....	1			1	Stenosis.
Endoaneurysmorrhaphy. (Matas) .....	4	1		5	Popliteal Aneurism.
Endoaneurysmorrhaphy. (Matas) .....	1			1	Fusiform Aneurism of Femoral.
Fistula in Ano .....	28			28	Excised, Packed, Sutured, etc.
Fistula in Ano .....	21			21	Incised, Cured, Cauterized, etc.

Wiring .....	1	1	Ununited Fracture of Clavicle.
Wiring .....	2	2	Ununited Fracture of Humerus.
Wires Removed.....			Ununited Fracture of Femur.

## SUMMARY OF OBSTETRICAL CASES IN 1907.

## AS PER HISTORIES FILED.

There were 299 Obstetrical cases delivered in the Hospital.

White .....	153	Primiparae .....	182
Colored .....	146	Multiparae .....	117

## PRESENTATIONS.

## POSITIONS.

Vertex.....	Left Occipito-Anterior.....	201
	Right Occipito-Anterior.....	61
	Right Occipito-Posterior.....	1
	Left Occipito-Posterior.....	1
Breech.....	Uncertain.....	23
Transverse.....		8
		4
		<u>299</u>

## MANNER OF DELIVERY.

Naturally.....	274
By Forceps.....	12
By Podalic Version.....	13
	<u>299</u>

There were 5 cases of Twin Pregnancy.

There was no case of Triplets.

## MORTALITY OF MOTHERS.

Of the 299 maternity cases, 11 died, making a mortality of 3. + per cent.

## CAUSES OF DEATH.

Eclampsia—(2 admitted in labor, after attempts to deliver outside).....	4
Placenta Previa—(both admitted in labor).....	2
Nephritis Chronic.....	1
Shock.....	1
Septicaemia—(2 cases admitted in labor, after ineffectual manipulation).....	3
	<u>11</u>

The number of children born was 304.

Male.....	159	Living.....	258
Female.....	145	Still-born.....	46—304

## ADMISSIONS. 1907.

(Note as to Deaths in Obstetrical Service.) Of the fatal Eclampsia cases two were admitted in labor after attempts to deliver elsewhere. One patient, successfully delivered, died of Chronic Interstitial Nephritis. Both Placenta Previa cases were admitted in labor as were two cases developing fatal Septicæmia, all having been manipulated before being sent to Hospital.

Infants delivered alive are technically "cured." Five, which subsequently died of intercurrent illness, are recorded as deaths from Broncho-Pneumonia, etc., under respective diagnoses. These five are to be deducted from the annual total as shown in recapitulation for the year.
